EDUCATION

Virginia Commonwealth University

Richmond, VA

Bachelor of Science in Business Information Systems

Graduating May 2026

- Relevant Coursework: Systems Analysis and Design, IT Infrastructure, Database Systems, Web Development, Business Analytics, Machine Learning, Data Communications, Design of AI Systems

WORK EXPERIENCE

Information Technology Intern

June 2024 – Present

VCU Technology Services

Richmond, VA

- Built a monitoring web app for 18 printers, cutting manual checks from 4 hours to 45 minutes and enabling proactive maintenance.
- Automated error-based ticket creation, shrinking printer downtime from 3 hours to 30 minutes and eliminating manual reporting delays.
- Trained 7 IT interns in hardware/software configuration, troubleshooting, and customer service, improving service quality and overall team efficiency.
- Provided IT support to 12 departments, accelerating issue resolution and improving end-user productivity.

Data Engineer Intern

August 2025 – December 2025

CSC Leasing

Richmond, VA

- Designed a document processing pipeline that automated ingestion, extraction, and validation of credit packages, reducing decision turnaround time for analysts by 30%.
- Worked closely with directors and analysts across Data Strategy and Credit to translate underwriting pain points into clear, prioritized automation requirements.
- Eliminated 5 hours of weekly analyst triage by standardizing data checks and automating credit package summaries, ensuring consistent, ready-to-review files.
- Automated exception routing and real-time package alerts, cutting weekly follow-up time between Sales and Credit by 2 hours.

Information Security Intern

June 2025 – August 2025

Sumitomo Mitsui Banking Corporation (SMBC Group)

New York, NY

- Led a 5-intern team in conducting 50+ interviews to map InfoSec inefficiencies, delivering automation and process-improvement recommendations directly to the CISO.
- Built an Azure Logic App to proactively manage 1,900+ application expirations, reducing IAM ticket volume by 3 tickets per week and preventing recurring access outages.
- Developed an automated monitor for critical SOC web apps, delivering immediate outage alerts to 60+ analysts and strengthening incident response.
- Improved threat detection accuracy by tuning Sentinel rules weekly, reducing false positives and strengthening alert quality in collaboration with SOC engineers.

LEADERSHIP EXPERIENCE

Co-Founder & Professional Development Chair

August 2025 – Present

LOTUS at VCU

Richmond, VA

- Coached 7 members into securing internship and job offers by strengthening resumes and conducting tailored mock interviews.
- Delivered a semester-long professional development program, organizing a series of workshops and speaker events for over 20 members.
- Recruited and coordinated with over 10 industry professionals to serve as guest speakers, mentors, and workshop facilitators.
- Built and maintained a resource database of opportunities and contacts, centralizing job search support for the organization.
